Frontend developer

Summary

A highly talented JavaScript and React developer, passionate about building modern web apps using the modern JavaScript stacks, always willing and happy to try new solutions and frameworks.

Projects

[Azure Shop](#)

Azure shop is an E-commerce full stack web application.

When create, edit or remove user, product, review or even order it will render in all application's screens in realtime by Socket.IO.

There are five several roles everyone has his own restrictions. Roles are user, seller, moderator, sub admin and admin.

There is a dashboard available only for moderators, sub admins and admin, everyone has his own restrictions.

Stack: React, TypeScript, TailwindCss, Redux, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, Rest API and Cloudinary.

[Instagram](#)

Instagram actually is a clone of Instagram. A lot of original Instagram's features are on my cloned Instagram. You will find the same UI of the Instagram with light and dark mode. You can follow others to get their posts and stories. You can create post, create story, give a like, create a comment, create a reply for the comment and you can delete all you are created.

Stack: Next.js, TypeScript, TailwindCss and Firebase.

[Imdb](#)

Imdb is a site for movies and series with introductions for movies and series. You can watch movies and series. You can search for a specific movie, a specific series or a specific actor.

Stack: Next.js, TypeScript, TailwindCss and TMDB API.
