Projects

Azure Shop

Azure shop is an E-commerce full stack web application.

when create, edit or remove user, product, review or even order it will render in all application screens with Socket.IO magic.

There is a five several roles everyone has own restrictions. Roles are user, seller, moderator, sub admin and admin.

There is a dashboard available only for moderators, sub admins and admin and every role has his own restrictions.

Azure shop has a lot of features on it.

Stack: React, TypeScript, TailwindCss, Redux, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, Rest API and Cloudinary.

Instagram

Instagram actually is a clone of Instagram. A lot of original Instagram features are on it. You will find the same UI of the Instagram with light and night mode. You can follow others to get their posts and stories. You can create post, create story, give a like, make comment, make reply for the comment and you can delete all you create. Actually a lot of features on it.

Stack: Next.js, TypeScript, TailwindCss and Firebase.

Imdb

Imdb is a site for movies and series with introductions for movies and series. You can watch Full movies and series. you can search for specific movie, specific series or actor. Actually a lot of features on it.

Stack: Next.js, TypeScript, TailwindCss and TMDB API.
